

Oral Health and Vision Health Impact Overall Health.

Oral health is an important component of overall health, and dental insurance programs prompt health conscious lifestyle behaviors. By design, dental insurance programs place an emphasis on diagnostic and preventive services. Dental insurance encourages people to seek care early, which often helps minor problems from escalating. Northeast Delta Dental offers dental insurance programs for organizations of all sizes.

Like dental coverage, vision insurance encourages regular examinations during which medical conditions may be detected for early intervention. In Maine and New Hampshire, Northeast Delta Dental offers DeltaVision®, a fully insured vision product available to employers of five or more benefit-eligible employees.

Contact Northeast Dental Dental or your insurance advisor to learn more.
